**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-15, drawn to a method of producing an exogenous protein in the cell, classified in class 435, subclass 69.1.
  - II. Claims 1-10 and 16-17, drawn to a method of inducing an endogenous protein in a cell, classified in class 435, subclass 68.1.
  - III. Claims 18-35, drawn to a method of treating/preventing a disease by inducing the expression of an exogenous protein, classified in class 514, subclass 44.
  - IV. Claims 18-30, 36, 37 and 46 drawn to a method of treating/preventing a disease by inducing the expression of an endogenous protein, classified in class 514, subclass 2.
  - V. Claims 38-45, drawn to a method of identifying a compound useful in treatment, classified in class 435, subclass 4.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions I and III are unrelated to Inventions II and IV. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

In the instant case the different inventions I and III are not disclosed as capable of use with inventions II and IV and have different modes of function and different effects. The function

Art Unit: 1635

and effects of Inventions I and III is to induce the expression of an exogenous gene while the functions and effects of Inventions II and IV are to induce the expression of an endogenous gene.

2. Inventions I and II are unrelated to Inventions II and IV. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects because Inventions I and II are drawn to a method of producing protein in a cell and Inventions II and IV are drawn to methods of preventing/treating disease. The methods have different function and effect.

3. Inventions I-IV are unrelated to Invention V. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects as Inventions I-IV are drawn to methods of inducing expression of protein in cells and methods of preventing/treating disease while Invention V is drawn to a method of identifying a therapeutic compounds. These inventions have different functions and effects therefore they are unrelated.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for each Group is different, restriction for examination purposes as indicated is proper.

Art Unit: 1635

6. A telephone call was made to Eugenia Garrett-Wackowski on January 8, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Eric Angell whose telephone number is (703) 605-1165. The examiner can normally be reached on M-F (8:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John L. LeGuyader can be reached on (703) 308-0447. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-4242 for regular communications and (703) 308-4242 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
